Designing and Making a Felt Decoration

Year 2

During the Autumn Term, Year 2 focused their Design and Technology lessons around decorations. We explored and evaluated existing decorations before designing our own following design criteria. The children practised their cutting and sewing skills on paper and then moved on to using felt.

It was tricky to cut the felt accurately and even more difficult to join the two pieces securely using either a running stitch or over stitch.

We persevered and, once they were nearly joined, we added stuffing to the middle of the decoration

before finishing joining them.

We enjoyed decorating the front to look like our design before we added a loop to make sure we could hang them up. We evaluated our work

afterwards to decide whether we had followed the design criteria and if we would change anything in future.

We hope you enjoyed displaying these decorations at home. We definitely enjoyed making them!
